

Beautiful music...without the wires

The complete wireless music solution for business

Eos offers an elegant, simple and affordable way to stream great sounding digital music wirelessly throughout any business. Connect the Eos wireless transmitter to any XM For Business music source and you're ready to go! The Eos system broadcasts over our proprietary all digital 2.4GHz stream and supports up to 4 wireless speakers at a distance of up to 300 feet.

The Eos wireless music system is simple to install. You just plug and it plays...no mind-bending complicated setup required. The Eos wireless music system is perfect for medical, dental & professional offices as well as spas, hair salons and other small businesses and offices.

Eos wireless speakers are fully self contained and plug into any wall outlet...without mounting or taking up any valuable space. The fully integrated wireless speakers feature great sounding 2.1 stereo speakers with a volume control which can be adjusted from each individual speaker to create the perfect sound level for any room environment. Eos offer a range of wireless audio solutions for any installation.
